

# Mastering MCQ Methods

## [ 'M<sup>3</sup>' Workshop ]

### Highlights

- Be exposed to the different types of concept-testing and skill-based Multiple Choice Questions (MCQs) prevalent in PSLE
- Learn useful 'STEPS' to tackle these questions
- Master useful tools/methods to increase the chance of achieving full marks for MCQ section

### Outline

For years, the MCQ section in Primary Science Assessments has been a highly overlooked section and its demands grossly underestimated.

Much is expected of your child to be able to score and ace this section! The thought that the MCQ section is a given and that your child will naturally do well in this section is risky.

In recent years, the standard for the MCQ section in PSLE Science has been noticeably raised; wrong options in questions are getting tougher to eliminate and with more skill-based questions tested, students are finding it more challenging to ace this section.

Is your child ready to take on these challenges and ace the MCQ section in PSLE Science?

### About Vitamindz™ Education

The learning of Science begins with Vitamindz™ Education. With our unique Vitamindz™ 'Eye' framework based on years of studies and research, we deliver to your child the highest standards in the teaching and learning of science using our proven techniques and approaches.

Given our wealth of experience in the arena of primary science education and the high success rate in quality passes of our students in PSLE science, parents can entrust their children with our MOE award-winning teachers.
